# **Sonatrach Petroleum Corporation**

# **Independant Auditors' report**

For the year ended December 31, 2018

To the Shareholders of Sonatrach Petroleum Corporation,

# Opinion

We have audited the financial statements of Sonatrach Petroleum Corporation ("The Company"), which comprise the statement of financial position as at December 31, 2018, the statements of profit or loss and changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the assets and liabilities and of the financial position of the Company as at December 31, 2018 and of the results of its operations for the year then ended in accordance with with International Financial Reporting Standards (IFRS).

# **Basis for Opinion**

### Audit Framework

We conducted our audit in accordance with International Standards on Auditing (ISAs). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditors' Responsibilities* for the *Audit of the Financial Statements* section of our report.

#### Independence

We are independent of the Company in accordance with International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in France and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Emphasis of Matter**

We draw attention to the matter described in Note 2 to the financial statements relating to the introduction of IFRS 15 "Revenue from contracts with customers" as from the 1 January 2018 and the change in accounting policy resulting from the introduction of this new accounting standard. Our opinion is not modified in respect of this matter.

#### Other Information

Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### 1. GENERAL INFORMATION AND BASIS OF PREPARATION

Sonatrach Petroleum Corporation (the "Company") was incorporated in the British Virgin Islands ("BVI") on May 3, 1989 in accordance with the International Business Companies Ordinance of 1984. The Company's principal activity is the trading of oil and liquefied petroleum gas ("LPG") products.

On January 1, 2007, the Company was automatically re-registered under the BVI Business Companies Act, 2004. The address of its registered office is Craigmuir Chambers, P.O. Box 71, Road Town, Tortola, BVI.

The stand-alone financial statements were authorised for issue on 13th April 2019 the Board of Directors (the "Board").

#### 2. SIGNIFICANT ACCOUNTING POLICIES

### Statement of compliance

The stand-alone financial statements have been prepared for the year ended December 31, 2018 and 2017 (the "reporting dates") in accordance with IFRS including new standards adopted by the IASB, that are obligatory for accounting periods commencing on or after January 1st, 2018. This includes principally IFRS 9, IFRS 15 and amendments to IAS 40, IFRS 2 and IFRS 4.

The application of IFRS 9 has no significant impact on the Company's financial statements on December 31, 2018.

## Basis of preparation

In regards to IAS 27.38, the stand-alone financial statements have been prepared on the historical cost basis except for financial instruments accounted for in in accordance with IFRS 9.

The accounting policies have been consistently applied to all years presented, except otherwise stated, and the principal accounting policies are set out below.

## Restatement of prior period financial information

In the context of evolving tax regulations, the company has initiated in 2013 discussions with HMRC in relation to the taxation of activities and services provided by SPC London Branch to SPC BVI.

The company has decided to reflect the discussions with HMRC as follow:

- ✓ In the 2013 accounts, for 2013 and 2012 the tax provision was estimated at \$2.9m, and financial statements were restated to present comparable information and 2012 opening equity was restated for adjustments related to prior periods for \$16m.
- ✓ In the 2014 accounts, the tax provision was estimated at \$2m, and a provision for late payment interest related to the tax provision was estimated at \$2m for 2014 and \$1m for 2013 and financial statements were restated to present comparable information. The 2013 opening equity was restated for adjustments related to prior periods for \$1.6m related to the late payment interest.
- ✓ In the 2015 accounts, the whole tax and late payment interest provisions was revalued following the current level of the discussions with HMRC, additional provision was added for \$46.3m in the year income tax expense and for \$4.2m in the year financial expense.

(Expressed in United States dollars)

✓ On the 6<sup>th</sup> of September 2016, the company reached a final settlement with HMRC whereby the profit split method has been identified and agreed upon as being the appropriate method to attribute 51.14% profits to SPC for the UK based operations.

## Investment in subsidiaries

A subsidiary is an entity (including a special purpose entity) over which the Company has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Investments in subsidiaries are recorded at historical cost for the preparation of the non-consolidated financial statements less any impairment in the value of the subsidiaries.

### Related parties

The Company's transactions and outstanding balances with related parties are disclosed. Parties are considered related if one party has control, joint control, and significant influence over the other party in making financial and operating decisions.

# Foreign currencies

The financial statements are presented in the currency of the primary economic environment in which the entity operates (its functional currency) which is the United States ("US") dollars. In preparing the financial statements, transactions in currencies other than the US dollars ("foreign currencies") are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting date, monetary items denominated in foreign currencies are translated at the rates prevailing at the reporting date. Non-monetary items that are measured in terms of historical costs in a foreign currency are not translated. Exchange differences are recognised in the income statement in the period in which they arise.

# Property, plant and equipment

Office equipment, motor vehicle and software are recorded at cost less accumulated depreciation and subsequent accumulated impairment losses.

Depreciation is charged so as to write off the cost or valuation of assets over their estimated useful life, using the straight-line method over four years. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The gain or loss arising on the disposal or retirement of an item of a fixed asset is determined as the differences between the sales proceed and the carrying amount of the asset and is recognised in the income statement.

The time-charter agreement states that, the vessel should go into drydock for cleaning, painting and serious repairs every 30 to 60 months from delivery date. Such repairs include, but are not limited to, major overhauling of machineries, structural repairs, paint, engine, tank cleaning and coating, cooling system, etc. Other variables are also considered in the estimate such as the location of the shipyard and the currency in which the shipyard operates. Such costs are capitalized as a component of the vessel and amortized over the period between 2 dry-docks which is over 5 years.

(Expressed in United States dollars)

# Impairment of tangible assets

At each reporting date, the Company reviews the carrying amount of its tangible assets (the "assets") to determine whether there is any indication that they have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss.

The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessment of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount. An impairment loss is recognised immediately in the income statement, unless the relevant asset is carried at a revaluated amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss is subsequently reversed, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, so that the revised carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the income statement unless the relevant asset is carried at a revaluated amount, in which case the reversal of the impairment loss would be treated as a revaluation increase.

### Inventories

Lube oil — Inventories stored on the LPG vessels is valued at the lower of cost and net realisable value. Cost is determined by weighted average method. These inventories are only held for the Very Large Crude Carrier (VLCC), there are no other sales to third parties performed.

Crude-oil — Crude-oil inventories held for trading purposes are measured at fair value less costs to sell. Changes in fair value less costs to sell are recognized in profit or loss in the period of the change.

### Financial assets, financial liabilities and equity instruments issued by the Company

Classification and measurement

Financial assets

IFRS 9 contains three principal classification categories for financial assets: Amortised cost, Fair Value through Other Comprehensive Income (FVOCI), and Fair Value through Profit and Loss (FVPL). This classification depends on the business model in which a financial asset is managed and its contractual cash flow characteristics.

Financial assets at amortized cost: these are financial assets held to collect contractual cash flows that consist solely of payments of principal and interests (SPPI) at specified dates. They are initially measured at fair value and subsequently measured at amortized cost using the effective interest method. This category mainly includes cash, trade receivables, term deposits, loans

Financial assets at FVOCI: these are debt instruments managed to collect and sell contractual cash flows that consist solely of payments of principal and interests (SPPI) at specified dates. They are initially measured at fair value, and subsequently measured at FV through OCI (recyclable). These are also equity instruments (non-consolidated) with irrevocable election at initial recognition to present changes in fair value in OCI with no recycling of gains or losses to income statement (except for dividends). The Company is not concerned by this category. Financial assets at FVTPL: these are financial assets acquired with the intention of resale in

Financial assets at FVTPL: these are financial assets acquired with the intention of resale in the short term, derivatives held for trading, equity instruments (non-consolidated investments)

(Expressed in United States dollars)

not measured at FVOCI by option and debt securities that are not managed under "collect and sell" and do not meet SPPI requirements. This category mainly include derivatives instruments. *Financial liabilities* 

Financial liabilities at amortised cost: these are borrowings initially measured at fair value, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at fair value through profit or loss: these are financial liabilities held for trading. This category corresponds mainly to derivative instruments.

Equity instruments issued by the company

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

# Recognition and de-recognition

Financial assets and financial liabilities are recognised in the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire; or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. The Company derecognises financial liabilities when, and only when, its obligations are discharged, cancelled or they expire.

Investments are recognised and derecognised on trade date where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value. Realised gains and losses on these investments are recorded in the income statement on the last in first out basis.

## Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liabilities, or, where appropriate, a shorter period.

### Fair value

The fair values of financial assets and financial liabilities is based on their quoted market prices at the reporting date ("valuation date") without any deduction for estimated future selling costs. Where no sale occurred at the valuation date, financial assets are priced at current bid price while financial liabilities are priced at current asking price.

Securities not traded on an exchange or over-the-counter shall have the value as the Company considers fair and reasonable; provided that the Company shall obtain at least one independent dealer or third-party pricing service quote (unless no quotes are available) and may not value such security above the highest price obtained from all independent dealer or third-party pricing service.

The fair value of derivatives that are not exchange-traded is estimated at the amount that the Company would receive or pay to terminate the contract at the valuation date taking into account current market conditions and the current creditworthiness of the counterparties.

(Expressed in United States dollars)

The valuation methods for each level are generally as follows:

- Level 1 (unadjusted quoted prices): prices accessible to the entity at the measurement date on active markets, for identical assets or liabilities;
- Level 2 (observable data): data concerning the asset or liability, other than the market prices included in initial level 1 input, which is directly observable (such as a price) or indirectly observable (i.e. deducted from observable prices);
- Level 3 (non-observable data): data that is not observable on a market, including observable data that have been significantly adjusted.

# Impairment of financial assets

IFRS 9 introduces a new impairment model which consists in recognizing impairment losses on financial assets based on Expected Credit Losses (ECL).

The Company recognises an allowance for ECL for all debt instruments not held at fair value through profit or loss. These instruments are essentially trade receivables.

For trade receivables, the Company applies a simplified approach in calculating ECL. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECL at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

## Cash and cash equivalents

The Company considers cash at bank and short-term deposits with original maturities of three months or less to be cash and cash equivalents.

#### Provision

A provision is recognised when the Company has a present obligation as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into consideration the risks and uncertainties surrounding the obligation.

#### <u>Leasing</u>

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

# The Company as lessor

Rental income from operating leases is recognised according to the lease agreement over the term of the relevant lease. The declining pattern of the lease payments does represent the time pattern of the user's benefits for reasons inherent to the vessels' performance curve over the 20 years lease term, as well as obsolescence factors.

# The Company as lessee

Operating leases payments are recognised as an expense according to the lease agreement over the term of the relevant lease. The declining pattern of the lease payments does represent the time pattern of the user's benefits for reasons inherent to the vessels' performance curve over the 20 years lease term, as well as obsolescence factors.

(Expressed in United States dollars)

# Revenue recognition

IFRS 15 ("Revenue from contracts with customers") establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaced IAS 18 Revenue and related interpretations.

The Company has adopted IFRS 15 using the cumulative effect method (without practical expedients), with the effect of initially applying this standard recognised at the date of initial application (i.e. January 1, 2018). Accordingly, the information presented for 2017 has not been restated – i.e. it is presented, as previously reported, under IAS 18.

Under IFRS 15, revenue is recognised when a customer obtains control of the goods or services. Determining the timing of the transfer of control – at a point in time or over time – requires judgement.

Revenue is measured at the fair value of the consideration received or receivable. It is reduced for estimated rebates and other similar allowances.

The revenue of the Company mainly includes of the following activities:

Sale of hydrocarbon products — Revenue from the sale of hydrocarbon products is recognised when all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the products;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the products sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Freight revenue — Freight revenue is recognised on a monthly basis based on a fixed contractual annual amount, less a prorated amount for any time the vessel is not available for use. Regarding Freight revenue, the Company only acts as an agent with related parties. Henceforth, in regards of IFRS 15, the company only presents the margin of the operation in the financial statements. The impact of the change in accounting policy is described in the following table.

	2018 as per IAS 18	Adjustements	2018 as reported
Revenue from hydrocarbon products	\$ 2 032 596 994	150	\$ 2 032 596 994
Revenue from freight, demurrage and others	90 469 014	71 404 677	19 064 337

Interest income — Interest income is recorded on the accrual basis, by the reference to the principal outstanding and at the effective interest rate applicable.

Dividend income — Dividend income from investments is recognised when the shareholder's right to receive payment has been established.

Deferred income — Amounts received in advance for the performance of services are classified as deferred income.

(Expressed in United States dollars)

# Other operating costs

All the expenses contributing directly in the realization of the revenues are classified as other operating expenses. The main items are: freight, port expenses and demurrage.

## **Taxation**

Under the current laws of the BVI, the Company is not subject to income, estate, corporation or capital gains taxes.

As discussed above (see note 2 "Restatement of prior period financial information") the company has engaged discussion with HMRC in 2013 and it was agreed at the completion of the negociation with HMRC that a profit split of the trading profit being attributable to the UK operations should be used as a basis for settling the historic open years.

Therefore, the profit split method has been identified and agreed with HMRC as the appropriate method to attribute profit to SPC BVI.

## Dividend distribution

Dividend distribution to the Company's shareholder is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the shareholder.

(Expressed in United States dollars)

# 3. CRITICAL ACCOUNTING JUDGEMENT AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

# Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have significant risks of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Useful lives of property, plant and equipment

The entity reviews the estimated useful lives of property, plant and equipment at the end of each annual reporting period. Management determined that the initial estimated useful life of the shipping vessels of between 20 and 25 years remains the most relevant estimate.

(Expressed in United States dollars)

SGCC	82	-
SPOTC		5
	\$ 23,574,727	\$ 40,408,002

# Alrar Transportation Corporation

The balance from ALTC relates to the funding of the construction of its LPG Vessel ("Alrar"), which was delivered on September 16, 2004. The amount is unsecured, interest is accrued at an annual rate of 5.5%, the repayment for 2018 is \$3.6 m (2017 \$3.6 m). The bank loan related to the construction of the LPG vessel "Alrar" has been paid in full as of March 31, 2015.

# Hassi Messaoud Transportation Corporation

The balance from HMTC relates to the funding of the construction of a LPG Vessel ("Hassi Messaoud"), which was delivered on March 31, 2005. The amount is unsecured, interest is accrued at an annual rate of 5.5%, the repayment for 2018 is \$3.5 m (2017 \$3.5 m). The bank loan related to the construction of the LPG vessel "Hassi Messaoud" has been paid in full as of March 31, 2015.

### New Ocean Shipping Venture

The balance from NOSVL relates to the funding of the construction of a VLCC Vessel ("Mesdar"), which was delivered on November 3, 2007.

The loan represented 100% of the initial working capital required to construct the VLCC. In prior years the loan was recorded as due from joint venture. During the year 2008, the remaining shares of the joint venture shares were purchased back and the loan increased to 100%.

In November 2, 2015, the bank loan related to the construction of the vessel was paid in full by New Ocean Shipping Venture.

At the same date, the Loan from SPC was reconfigured in a new loan and raised from \$29.7 m to \$42.4 m with a rate of LIBOR + 0.375. The repayment for 2018 is \$6 m (2017 \$6 m).

## Rhourd Enouss Transportation Corporation

The balance from RNTC relates to the funding of the construction of its LPG Vessel ("Rhourd Enouss"), which was delivered on December 5, 2004. The amount is unsecured, interest is accrued at an annual rate of 5.5%, the repayment for 2018 is \$3.6 m (2017 \$3.6m). The bank loan related to the construction of the LPG vessel "Rhourd Enouss" was paid in full as of March 31 2015.

# Sonatrach Gas Carrier Corporation

The balance from SGCC is NIL. LPG Vessel "Reggane" was delivered on November 30, 1999. The loan from SPC was fully paid as of June 01, 2016.

(Expressed in United States dollars)

Sonatrach Petroleum Overseas Transportation Corporation

The balance from SPOTC SGCC is NIL LPG Vessel ("Djanet") was delivered on October I, the loan from SPC was fully paid as of June 01, 2016.

# 7. TRADE AND OTHER RECEIVABLES

	 2018	_	2017
Trade receivables	\$ 236,110,646	\$	487,687,379
Allowance for doubtful debts	(511,593)		(43,454)
	235,599,054		487,643,925
Other receivables	 1,528,983		1,705,922
	\$ 237,128,036	\$	489,349,847

# Trade receivables

The standard credit period on sales of hydrocarbon products is 30 days. No interest is charged on the trade receivables for the first 30 days from the date of the bill of lading. Thereafter, interest is charged at Libor + commission per annum on the outstanding balance. There are some specific arrangements made with some clients where the payments are due in 180 days and where the interest charged is at Libor + 1.5%.

Before accepting new customers, the Company assesses the potential customer's credit quality and defines the credit period and the guarantees required. The Company's largest customer has an open balance of \$162,102,358 as of December 31, 2018 (2017 — \$135,844,846). Its

(Expressed in United States dollars)

credit period is 180 days, interest is charged at the Libor rate + 1.5% and a letter of credit is required as a guarantee.

## Ageing of past due

The table below shows the ageing of receivables at the reporting date:

		 2018		 	2017	
0 - 31 days		236,011,109	99.94%		487,402,806	99.94%
31 - 180 days		58,631	0.04%		218,224	0.04%
181 - 1 year		450	0.00%		1,867	0.00%
1 - 5 years		40,457	0.01%		48,924	0.01%
+5 years		 0	0.00%		15,558	0.00%
	Total	\$ 236,110,646	100.00%	\$	487,687,379	100.00%

	2018	2017
Balance at the beginning of the year	(43,454)	(43,454)
Impairement losses recognised on receivables	(468,139)	
Amounts recovered over the year	-	-
Amounts written off as uncollectible	-	-
Balance at the end of the year	(511,593)	(43,454)

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss pattern (product type, customer type and rating...). The letters of credit and other forms of credit insurance are considered integral part of trade receivables and considered in the calculation of impairment

In determining the recoverability of receivables for the year, the Company holds a meeting with all parties concerned to discuss the possibilities to recover the receivables. Depending on the age and recoverability of the outstanding amounts, the accounting department determines the allowance for doubtful debts. Any write-offs of significant receivables need to be approved by the Board.

The concentration of credit risk is limited because the customer base is large and unrelated. Accordingly, management believes that there is no further credit provision required in excess of the allowance for doubtful debts.

(Expressed in United States dollars)

# 8. INVENTORIES

	2018	2017
Inventory	_	8,580,344

The 2017 \$8,580,344.89 was a balance of quantities of LPG products purchased in December 2017 and sold in January 2018.

## 9. CASH AND CASH EQUIVALENTS

## 11. DUE TO RELATED COMPANIES

Current		2018	2017
Due to parent company			
Due to parent company		-	-
Due to subsidiaries		(842,103)	8
Due to related parties	(i)	53,125,197	233,239,519
		\$ 52,283,094	\$ 233,239,519

### (i) Due to related parties

An amount of \$53,125,197 is due to Sonatrach SpA (2017 — \$233,239,519) and includes \$53,104,449 (2017 — \$232,725,242) that relates to purchases of hydrocarbon products made on normal commercial terms.

All amounts are unsecured, interest free and have no fixed repayment terms.

# 12. TRADE AND OTHER PAYABLES

	·	2018	 2017
Trade payables	\$	157,738,375	\$ 115,606,606
Other payables		1,732,432	 6,719,547
	\$	159,470,807	\$ 122,326,152

The related credit period with this supplier is 180 days, but the Company's policy is to discount the invoices within an average of 60 days. No credit limit or guarantees have been required by the supplier.

The standard credit period on purchases of hydrocarbon products is 30 days. No interest is charged on the trade payables for the first 30 days from the date of the invoice. In most cases there will be no interest charged on the outstanding balance. There are some specific arrangements made with some suppliers where the payments which are overdue will be charged at the interest rate stated in the contract, which varies from LIBOR plus a commission to 14-18%. The Company has financial risk management policies in place to ensure that all payables are paid within the credit timeframe.

(Expressed in United States dollars)

## 13. ADMINISTRATIVE EXPENSES

Administrative expenses mainly include employee benefit expenses amounting to \$ 2,631,766 (2017 — \$2,241,599). Among the employee benefit expenses, an expense of \$72,143 (2017 — \$56,443) was recognised for defined contribution plans.

#### 14. RELATED PARTY TRANSACTIONS

# Purchases and sales of hydrocarbon products

During the year, purchases of \$ 1,713,548,266 (2017 - \$1,108,745,955) of hydrocarbon products were made from Sonatrach Spa. These purchases were based on negotiated contracts between the parties at market prices.

Also during the year, sales of \$ 67,676,888 (2017 — \$733,650,961) of hydrocarbon products were made to Sonatrach Spa. These sales were based on negotiated contracts between the parties at market prices.

# Freight revenue and costs

The Company time charters vessels from its subsidiaries SGCC, SPOTC, ALTC, RNTC, HMTC and NOSVL. The Company then in turn places these vessels on time charter with Sonatrach Spa. Due to the change in accounting policy described in Note 2 of the financial statements, Freight revenues from these transactions are now netted off against the corresponding Freight costs

### Financial income

During the year, the Company charged interest to its subsidiaries SGCC, SPOTC, ALTC, RNTC, HMTC and NOSVL totalling \$1,930,677 (2017 — \$2,404,382) in relation to their outstanding loan balances.

### Dividend income

During the year, the Company received dividends from its subsidiaries, totalling \$6,000,000 (2017 — \$14,500,000).

#### Other income

During the year, the Company charged administrative expenses to its subsidiaries SGCC, SPOTC, ALTC, RNTC, HMTC and NOSVL totalling \$1,550,000 (2017 — \$1,550,000) in relation to the administration services provided by the Company.

# 15. FINANCIAL INCOME AND FINANCIAL EXPENSES

Interests on time deposits have generated an income of \$1,204,163 (2017 - Nil).

#### 16. COMMITMENTS

### Leases

The company holds two leases signed on 10th June 2010 and 23rd February 2011, with the rent commencement dates on those leases being the first anniversary of each lease. Following the rent review dated 25th August 2016, the annual amount paid in 2018 is £612,695 excluding service charges. Future lease payments are as follows:

(Expressed in United States dollars)

Not later than one year Later than one year and not later than 5 years £ 612,695 £ 2,450,780

# LPG Purchases:

As of December 31, 2018, the Company is committed to purchase each month the LPG quantities available in Algerian ports from the following suppliers:

- BP Amoco Exploration (In Amenas) Limited (committed until 29/11/2019);
- PT Pertamina Algeria Eksplorasi Produksi (committed until 31/03/2019);
- Anadarko Energy Services Company (committed until 31/03/2019);

## LPG Sales:

As of December 31, 2018, the Company sold all the LPG quantities made available by these suppliers.

# Liquid Purchases:

As of December 31, 2018, the Company is committed to purchase each month the Liquid quantities available in Algerian ports from the following suppliers:

- 3,000 barrels per day during 1<sup>st</sup> November 2018 to 31<sup>st</sup> October 2019 of Saharan Blend Crude from PTT International Trading London in parcel size of 140,000 bbls to 230,000 bbls
- Approximately 7,000 metric tons per calendar month of Algerian Plant Condensate during
   1st January to 31st December 2019 from Anadarko Energy Services Company Texas USA
- 70,000 mt +/- 10% Buyers' option per month of Algerian Condensate loading during
   January-December 2019 from SH-Com, to be co-loaded with Anadarko parcel
- 5 firm cargoes plus 2 optional cargoes per quarter of 3 months (totally 20 firm cargoes plus 8 optional cargoes) of Skikda Straight Run Low Sulfur Fuel Oil loading during January-December 2019 from SH-Com, each parcel size 55,000 mt +/- 10% BO
- ZR Energy
- EuroNova

### Liquid Sales:

- 80,000 mt +/- 10% Buyer's option per month of Algerian condensate loading during January-December 2019 to BGN International DMCC Dubai
- 5 firm cargoes plus 2 optional cargoes per quarter of 3 months (totally 20 firm cargoes plus 8 optional cargoes) of Skikda Straight run Low Sulfur Fuel Oil loading during January-December 2019 to ExxonMobil, each parcel size 55,000 mt +/- 10% BO

# Guarantees

As at December 31, 2018, the potential maximum amount the Company could have to pay under letters of credit or guarantees totalled \$ 100,000 (2017 — \$100,000). These relate to guarantees on foreign payments under letters of credit made to purchase hydrocarbon products in some foreign countries.

(Expressed in United States dollars)

## 17. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS

The Company's activities expose it to a variety of financial risks: credit risks: liquidity risk and market risk.

This note presents information about the Company's exposure to each of the above risks, its objectives, policies and procedures for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements. The board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

### Financial risk management

#### Credit risk

Credit risk is the risk that counterparty will be unable to pay the amounts in full when due. Credit risk arises from derivative financial instruments and deposits with financial institutions, as well as credit exposures to cash and cash equivalents and trade receivables including outstanding receivables and committed transactions.

The Company's maximum exposure to credit risk at the reporting dates is:

2018	2017
\$ 237,128,036	\$ 489,349,847
36,574,191	209,777,855
344,700,846	69,423,978
23,574,727	40,408,002
6,000	6,000
\$ 641,983,800	\$ 808,965,682
	\$ 237,128,036 36,574,191 344,700,846 23,574,727 6,000

The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults.

#### Bank and financial institutions

The Company seeks to mitigate its exposure to credit risk arising from cash and cash equivalents and transacting its securities and derivative activities with reputable financial institutions.

#### Trade and other receivables

The Company has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. The Company's review includes bank references and the due diligence searches by the Company's bankers. The Company requires guarantees and in the

(Expressed in United States dollars)

case bank guarantees are not issued or confirmed by a first class bank, customers transact only on a prepayment basis.

The Company does not set any purchase limits for its customers but follows up on the volume of sales made to each customer, both at the operational and financial levels.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of trade receivables and, where appropriate, mainly in risky countries, credit guarantee insurance cover is purchased to mitigate the credit risk exposure.

The table below shows the credit limit and balance of six major counterparties at the reporting dates:

	2018					2017		
	Credit limit	Ca	rrying amount		Credit limit	Ca	rrying amount	
Counterparty	Unlimited	\$	162,102,358	Counterparty	Unlimited	\$	135,844,846	
Counterparty	Unlimited		48,979,141	Counterparty	Unlimited		83,968,094	
Counterparty	Unlimited		17,923,673	Counterparty	Unlimited		68,037,482	
Counterparty	Unlimited		2,999,302	Counterparty	Unlimited		41,140,410	
Counterparty	Unlimited		2,712,085	Counterparty	Unlimited		19,771,384	
Counterparty	Unlimited		1,304,243	Counterparty	Unlimited		15,759,962	

No changes in the financial condition of these counterparties were encountered during the year and management does not expect any losses from non-performance.

### Intercompany receivables

Intercompany trades are performed under normal commercial terms. Due to long-term relationships between the companies, no guarantees are required. Short-term transactions are interest free, whereas long-term receivables are charged an annual fixed rate of average 5.5%. The exposure to the credit risk is limited due to the creditworthiness of the Group, and to the ultimate holding Company, Sonatrach Spa, being a state owned company. Management does not anticipate any losses from non- recoverability of the intercompany receivables. Ongoing follow up on a trade and financial basis is performed to ensure amounts are recovered from all the parties.

### Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities.

The following tables detail the Company's expected maturity for its financial assets and liabilities at the reporting dates, based on the remaining period at the reporting dates to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

(Expressed in United States dollars)

Maturity profile of financial assets and financial liabilities at December 31, 2018:

The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Management continuously monitors forecast and actual cash flows by maintaining the maturity profiles of financial assets and financial liabilities.

# SONATRACH PETROLEUM CORPORATION NOTES TO STAND-ALONE FINANCIAL STATEMENTS

### FOR THE YEAR ENDED DECEMBER 31, 2018

(Expressed in United States dollars)

The Company manages liquidity risk by maintaining banking facilities, by discounting invoices of 180- days credit period with some specific customers, by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities. The Company maintains adequate highly liquid assets in the form of cash and cash equivalents to assure necessary liquidity.

# Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of market prices. Market risk comprise of three types of risk: foreign currency risk, interest rate risk and other price risk.

# Foreign currency risk

Foreign currency is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the British pound ("GBP"), the Algerian dinar ("DZD") and the Euro ("EUR").

Foreign exchange risk arises from intercompany transactions, future commercial transactions, recognised assets and liabilities and net investments in foreign operations, which may affect the profitability and cash flows of the Company.

The table below summarises the Company's net exposure to foreign currency risk at the reporting dates. The figures in the table are the local currency converted to US dollars.

	2018	2017
Assets		
Trade and other receivables	\$ 140,079	\$ 176,262
Prepayments	439,825	590,729
Cash and cash equivalents	959,442	508,288
Liabilities		
Trade and other payables	(434,458)	(364,877)
Current income tax liabilities	(514,047)	
Net assets (liabilities) exposed to foreign currency	\$ 590,840	\$ 910,402

The Company's exposure to the risk is limited as the major part of the hydrocarbon product trades are performed in the functional currency. Following the Company's sensitivity to 10% change in the US dollar against the three main foreign currencies stated, the impact on the Company's net assets would be insignificant. Therefore, the Company does not manage foreign exchange risk against US dollar through the use of financial instruments.

### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The majority of the Company's financial assets and liabilities are non-interest bearing with the exception of the cash and cash equivalents and trade receivables and payables. As a result,

(Expressed in United States dollars)

the exposure of the Company's income and operating cash flows is limited to changes in market interest rates.

# Commodity price risk

The Company manages its exposure to fluctuations in commodity prices, if applicable, through the use of derivative financial instruments, futures and swaps, on a commodity exchange or with a highly rated counterparty.

Futures — Commodity futures contracts ('futures") are commitments either to purchase or sell a designated commodity at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Futures have little credit risk because the counterparties are futures exchanges.

Swaps — Commodity swaps are arrangements in which a fixed-price contract for a commodity is exchanged for a floating-price contract.

At the reporting date, the Company has no exposure to commodity price risk as it has no open derivatives contracts and no crude oil inventory.

### Fair value

The fair values of financial assets and liabilities are determined as follows:

- the fair value of financial assets and liabilities with standard terms and conditions and traded on active liquid markets is determined with reference to quoted market prices;
- the fair value of other financial assets and financial liabilities (excluding derivative instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments;
- the fair value of derivative instruments is calculated using quoted market prices or valuation techniques based on observable inputs.

At the reporting date, the Company considers that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the financial statements; approximate their fair values.

The financial instruments carried at fair value have been categorised under the three levels of the IFRS fair value hierarchy as follows:

- Level 1: quoted prices in active markets for identical assets or liabilities.
- Level 2: valuation techniques based on observable inputs either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: valuation techniques using significant unobservable inputs.

Assets
Due from subsidiaries - non current
Trade and other receivables - current
Due from related companies - current
Financial assets at fair value through profit and loss

Liabilities
Trade and other payables - current
Due to related companies - current

Financial liabilities at fair value through profit and loss

Carrying Amount	Fair Value					
Garrying Arrount	Level 1	Level 2	Level 3			
23,574,727	-	23,574,727	-			
237,128,036	-	237,128,036				
19,740,915	-	19,740,915				
_	- [	-				
159,470,807	-	159,470,807				
52,283,094	-	52,283,094				
_	-	-	-			

(Expressed in United States dollars)

The level 1 includes derivative contracts (futures) traded in a regulated market and the level 2 includes derivatives contracts (commodity swaps) traded over the counter (OTC)."

# Capital risk management

The Company's objective when managing capital is to ensure that it will be able to continue as a going concern while maximising the return to shareholders and benefits to other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. There were no changes in the Company's approach to capital management during the year.

### 18. ULTIMATE HOLDING COMPANY

The immediate control of the Company is held by Sonatrach International Holding Corporation ("SIHC"), a company incorporated in the British Virgin Islands, which is ultimately owned by Sonatrach SpA, a wholly owned Algerian state company.
